

α -Tubulin mouse monoclonal antibody
 α -Tubulin (MG17) Mouse Monoclonal Antibody

Product number	DIB2012	DIB2012L
specification	100ul	1ml

Product name: anti- α -tubulin mouse monoclonal antibody

Antibody source: mouse IgG

Clone number: MG17

Concentration: 1mg/ml

Immunogen: Human α -tubulin full-length protein is used as the immunogen.

Product description: Microtubules are an important part of the cytoskeleton and exist in all mammalian cells. Microtubules are composed of α -Tubulin and β -Tubulin with a molecular weight of about 55KD, and exist in the form of $\alpha\beta$ heterodimers. The expression level of α -tubulin protein is relatively constant, and it is often used as the internal control of the Western Blot detection system.

Recommended dilution: Western blot (WB): 1:1000—1:10000

Storage conditions: Store at -20° C.

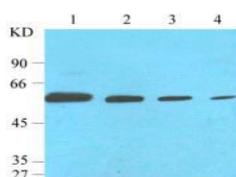

Validity period: 12 months.

Solution composition: 0.01M PBS (PH7.4), 0.1% BSA, 0.02% sodium azide, 50% glycerol

Response species: human, rat, mouse, etc.

- Matters needing attention:
1. Please choose to use anti-mouse secondary antibody, such as goat anti-mouse IgG (H+L)-HRP (DIB 3006).
 2. Please determine the best antibody dilution according to the experiment.
 3. This product is only used for scientific research and cannot be used for clinical diagnosis.

Related Information:

WB detection of α -Tubulin (MG17) antibody, the antigen is HeLa cell lysate, 20 μ g of protein is loaded per pore, and the antibody is 1:5000 (1), 1:10000 (2), 1:20000 (3), 1 : 40000 (4) dilution.
